Labels.

Perfect Keep

Perfect Keep is a multi-user Integrated Library System developed to manage your library in a systematic way that doesn't cost you an arm or a leg!

Perfect Keep is so dynamic that you can attach barcode scanners, security door and even theft alarms. It is also possible not to add anything extra and just purchase Perfect Keep itself.

Perfect Keep runs on a webserver, utilizing the ever increasing power of Open Source Technology for its coding. Thus, delivering your library information in a secured and comfortable way.

Perfect Keep is highly customizable, has a complete bibliography administration you ever wanted and a complete member registration. It has a relatively fast search engine and is Online Public Access Catalog (OPAC) enabled.

Perfect Keep is an open source product from ITProz Consulting Enterprise based on OpenBiblio. Perfect Keep is specifically enhanced and customised by ITProz Consulting Enterprise. We have rebuilt Perfect Keep into a more reliable, user friendly, scalable and most importantly affordable Integrated Library System.
